- Optimize Avian Health
- Streamline Manure Management
- Minimize Feed Waste

Farmers' Helper UltraKibble™ is used to improve the sustainable practices of Small Farmers, Backyard Hobbyists, Aviculturists, and others who keep flocks of valuable fowl, by supporting birds' health, decreasing feed costs and streamlining maintenance. Farmers' Helper UltraKibble™ is a **Premium Nutritional Supplement** intended as an addition to the daily maintenance diets of domestic fowl raised for eggs and protein, backyard pets, and captive wild species kept for enjoyment and increased quality of life.

Animal stewards will see solid and more manageable droppings due to ingredients that promote digestive tract health, including elevated levels of dietary fiber. Our products optimize avian health and minimize feed wastage.

Farmers' Helper UltraKibble™ contains:

- A balanced mix of high-quality animal and plant proteins to duplicate nutrients consumed by an omnivore. Animal protein is sourced from fish meal and salmon meal.
- Elevated levels of dietary fiber and trace minerals in the form of salmon meal, as well as dehydrated vegetables: including watercress, celery, beets, and spinach.
- Our manufacturing process gelatinizes starches, which increases digestibility and reduces dust levels that arise from feed rations.
